

# PRO PRESS SYSTEM

SOFT GEL TIPS THAT OFFER QUICK, STRONG AND BEAUTIFUL ENHANCEMENTS.

## APPLICATION GUIDE

- 1 PERFORM A MANICURE.** Firstly disinfect the clients hands. Remove cuticle, shape the natural nail and buff the nail plate to remove all surface shine.
- 2 CLEANSE.** Soak a lint free pad with Pro Prep & Wipe solution and scrub the nail plate. Ensure all dust is removed and the entire nail is dehydrated. The nail should appear white and chalky.
- 3 SIZE THE TIPS.** Size all your clients nails for their Pro Press tips. Ensure the tip fits sidewall to sidewall. You can file the tips if required for the perfect fit.
- 4 ETCH THE TIPS.** Using a nail file or e-file etch the contact area of the inside of each tip. After etching cleanse the tip with a lint free wipe and our Pro Prep & Wipe solution.

5

**PH BOND.** Apply a small amount of PH Bond solution to the client's natural nails. Allow air dry for 10-15 seconds.

6

**PRIME.** Apply a small amount of our ULTRA Primer or PRO Primer to the natural nails. Allow air dry for 10-15 seconds.

7

**BASE LAYER.** Apply a thin even layer of the Pro Press tip adhesive to the clients natural nail. Ensure this coat is kept thin and does not flood the sidewalls. **DO NOT** cure this layer. Proceed straight away to step 8.

8

**FILL THE TIP.** Apply a small bead of the Pro Press tip adhesive to the etched contact area of the tip. Do not over fill the tip as this can lead to seeping when applying.

9

**PRESS.** Place the tip at the cuticle area and using light pressure press the tip onto the nail at an angle pressing the gel adhesive down the natural nail.

- 10** **FLASH CURE.** Hold the tip in place with your thumb or the clear nail clip included with the Pro Press starter kit and flash cure with the IN A FLASH LED torch for 5 seconds to secure the tip in place. Repeat all steps on the clients 5 fingers then fully cure in our Dual Pro UVLED lamp for 60 seconds.

- 11** **REFINE.** Using a 180 grit Pro File refine the Pro Press tip paying attention to blend the cuticle contact area and remove the surface shine. Clean and cleanse the tip with Pro Prep & Wipe solution.

- 12** **GEL POLISH.** Apply 2 coats of your desired gel polish colour. Ensuring to cap the free edges of the Pro Press tips. Cure each layer in our Dual Pro UVLED lamp for 60 seconds.

- 13** **SEAL.** Finish your Pro Press manicure by sealing each nail with a top coat of your choice from our gel polish range.

- 14** **MOISTURISE.** Apply Bio Cuticle oil to the client's nails and massage in.
